Notes to the foundation plan

The concrete for the foundations must be prepared in accordance with the strength class conforming to German standard C 25/30 (B 25), $f_{ck, cube} = 30 \text{ N / mm}^2$. The concrete must have a flowing consistency. The concrete must be compacted during grouting by vibration, tamping, beating or puddling.

The specified setting times must be adhered to.

The measures given in the foundation plan

have to be strictly followed, maximum deviation $\pm 2 \text{ cm}$.

All concrete foundations must be covered with minimum 30 cm of impact attenuating material. The upper edges of the foundations must be well bevelled or rounded off. In no case water may collect on the surfaces of the foundations.
