# Multi deck play tower with banister bars ADA

This impressive multi tower structure challenges the children with its multi-layered climbing and sliding. The climbing wall challenges and invites a shorter or a longer climb, to the lower platform or to the upper level. From here the really thrilling bannister bars take the child back to ground level. The access is allowed via the outside climbing wall only. Next to the large stairway, a play table invites meetings. A smaller stairway leads up to a den under the deck. The product is available as FSC® Certified (FSC® C004450) robinia wood on request.

<b>Product Line</b>	Organic Robinia
