KOMPAN
Let's play

Item no. PCE111021-0901	
General Product Information	
Dimensions LxWxH	428x427x383 cm
Age group	6+
Play capacity (users)	12
Colour options	

Wow! The Tracker is a fantastic structure that will thrill children. With play on all sides, children will enhance their development in all areas, and they will play for longer times. Physical development will be supported by the rich variation of climbing, sliding, spinning and gliding activities. These all strengthen muscles and build important motor skills such as cross-

coordination. The wall climber and climbing pole are especially attractive and fun for children when they are building their climbing skills and strength. These experiences are also enhanced by the design of the Tracker which encourages social-emotional play and cooperation. With room for many to play, the Tracker supports social skills. The accessible

stairway invites all in, and the room under the platforms is a nice place to retract from the wilder gliding and sliding play. The Tracker perfectly supports all areas of development through active play.

The Curved ELEMENTS panels are moulded of UV stabilised recyclable PE with multiple options for in-built play features that also ensures a strong panel solution. Straight panels are made of KOMPAN 19mm PE EcoCore™ which is a highly durable, ecofriendly and recyclable material.

The climbing elements displayed are moulded in one piece with a minimum 5mm wall thickness. The climbing elements are made of recyclable PE which has a high impact resistance across a wide temperature span which ensures vandal resistance in all locations.

The ELEMENTS roofs are made of recyclable PE with a minimum wall thickness of 5 mm to ensure high durability in all climates around the world. The steel pipes are hot dip galvanised inside and outside for maximum durability.

The main posts are made of high quality pre-galvanized steel with powder coated top finish. Post tops are closed with caps of UV stabilized nylon (PA6). The grey colored molded decks are made of 75% post-consumer ocean waste PP material with a non-skid pattern and texture surface. All decks are supported by unique designed low-carbon aluminum profiles with multiple attachment options.

ELEMENTS rubber membranes are conveyor belt made of layers of rubber mixed of natural rubber and SBR rubber, and embedded with layers of armouring made of woven PE and PA. The thickness 8mm ensures high durability in any environment.

ELEMENTS ropes has six-stranded steel wires and a steel wire core. Each strand is tightly wrapped with PES yarn, which is melted onto each individual strand. After initial friction has removed the surface fibers, a harder PES coating remains to protect each strand, making the ropes highly wear- and vandalism-resistant.

Item no. PCE111021-0901

Installation Information

Max. fall height	179 cm
Safety surfacing area	37.2 m ²
Number of installers	2
Total installation time	22.3
Excavation volume	0.41 m ³
Concrete volume	0.06 m ³
Footing depth (standard)	85 cm
Shipment weight	647 kg
Anchoring options	Surface ✓ In-ground ✓

Warranty Information

EcoCore HDPE	Lifetime
Post	10 years
PP Decks	10 years
Ropes & nets	10 years
Spare parts guaranteed	10 years

Cradle to Gate A1-A3	Total CO ₂ emission	CO ₂ e/kg	Recycled materials
	kg CO ₂ e	kg CO ₂ e/kg	%
PCE111021-0901	1,352.70	2.80	42.50

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Validation of CO₂ calculation of: Play systems

Data version no. 2021-01-11

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Play systems" represented by item no.: PCM200309-0010. (Scope 3 emissions include emission sources in the upstream and downstream value chain).

Date: 15. October 2021 | Valid until: 15. October 2023

Validated by:

Bente Hviid, Senior Consultant

Peter Bendtsen, Senior Consultant

Validation based on report: Validation of CO₂ calculation of play systems – Kompan, version 1.0, prepared by: Bureau Veritas HSE, Denmark: Bente Hviid and Peter Bendtsen.

Publication date: 15. October 2021
