The Embankment Slide is extremely attractive. It makes children loop up hill and slide down again and again. The Embankment Slide will be a main attraction in a playground. Apart from the immense thrill of sliding, the Embankment Slide also supports children in developing important motor skills such as the sense of balance and space. These are important in

managing the world confidently and securely. The repeated loop of sliding and running back up for one more go is great training of cardio and muscle strength. Gaining the courage to go down the tall slide adds a sweet sensation of achievement. This is a social-emotional benefit, which is further enhanced by the cooperation and turn-taking skills that children train when

playing together on the slide. The slide mouth is extra long to add a feeling of security
