

Sandworks

PCM506

Item no. PCM506-0902

General Product Information

Dimensions LxWxH	254x243x217 cm
Age group	2+
Play capacity (users)	11
Colour options	

The Sandworks is an immensely attractive sand play unit that will absorb children in play for hours and hours. The crane is worked by pulling the chain. The sand bucket will go up or down or all around, but it will stay put when the chain is let go of. This, apart from providing fascinating sand play, is a great training of children's logical thinking skills. The negotiation

and cooperation to get sand to and from the sand table develops social-emotional skills. The sand table's sieve and tube lead sand away, training young children's understanding of object permanence: that things can still exist when out of sight. The sand bucket and shovel adds a quieter sand play corner. The platform is open and can be accessed in multiple ways,

allowing for all users to play.

Data is subject to change without prior notice.

Sandworks

PCM506

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco friendly material, which is not only recyclable after use, but also consists of a core produced from 100% recycled material.

All decks are supported by unique designed aluminium profiles with multiple attachment options by usage of pressure moulded aluminium connectors. The HPL decks with a thickness of 17.8 mm with a very high wearing strength and a unique KOMPAN non skid surface texture.

Sand shovel is made of PP and attached to the stainless steel pipe by a stainless steel chain. PP has good wearing and impact resistance.

The sand hoist is designed with upper and lower EcoCore tracks of large diameter that always ensures safe distance between the chains so they can't be crossed for entanglement. The chain is made of high-quality stainless-steel to ensure long durability of the product.

The sand bucket is made in one piece of molded PE. PE has high impact resistance across a wide temperature span which ensures vandal resistance in all locations.

Sand pipe is made of PP. PP has good wearing and impact resistance which makes it perfect for sand play activities.

Item no. PCM506-0902

Installation Information

Max. fall height	48 cm
Safety surfacing area	22,2 m ²
Number of installers	2
Total installation time	10.1
Excavation volume	0,25 m ³
Concrete volume	0,01 m ³
Footing depth (standard)	90 cm
Shipment weight	245 kg
Anchoring options	In-ground ✓ Surface ✓

Warranty Information

EcoCore HDPE	Lifetime
HPL decks	15 years
Post	10 years
Solid plastic parts	10 years
Spare parts guaranteed	10 years

Sand hoist

Physical: pulling the chain trains hand and arm muscles as well as the coordination of movements.
Social-Emotional: cooperation and turn-taking skills are supported when cooperating from platform to ground level on filling and hoisting sand up and down.
Cognitive: logical thinking skills are trained when understanding that pulling down makes the sand shovel go up.
Creative: working with movable play items that can leave a mark supports the child's creativity.

Sand shovel

Physical: develops dexterity and upper body muscles.
Cognitive: understanding of object permanence, emptying and filling scoop.

Desk

Social-Emotional: fine meeting place and a space creator. Sharing and cooperation from both sides create a social scenario that supports communication and cooperation.

Sand bucket on tube

Physical: filling and emptying the sand bucket trains fine motor skills as well as hand strength.
Social-Emotional: cooperating with others on the ground on filling and emptying the bucket supports negotiation and turn-taking skills.
Cognitive: helps to develop cause-and-effect understanding of younger children when buckets are transported on tubes, filled and emptied.

Funnel

Social-Emotional: trains cooperation and turn-taking as children put materials into the funnel.
Cognitive: the passing of materials through funnels supports the children's logical thinking and for younger children the understanding of object permanence: that materials don't vanish but run through at the other end.

Sandworks

PCM506

PHYSICAL
Joy of movement:
motor skills, muscle, cardio
and bone density

SOCIAL-EMOTIONAL
Joy of being together:
teamwork, tolerance and
sense of belonging

COGNITIVE
Joy of learning:
curiosity, understanding of causal
relationships and knowledge of the world

CREATIVE
Joy of creating:
co-creation and experimenting
with materials

BALANCE
To balance is to stay upright when walking or standing on a surface that makes this challenging (e.g. a wobbly, inclined, or narrow surface).

HANG IN ARMS
To hang in arms is the act of carrying the body with the hands or arms, possibly to traverse to another platform or play item.

SENSORY
To sense is the act of taking in information with the sensory system: seeing, feeling, hearing or sensing with the body.

BOUNCE
To bounce is the act of bouncing on a responsive, flexible, elastic or tensile surface.

JUMP
To jump is the act of jumping up or down on a hard surface.

SLIDE
To slide is the act of moving fast downwards seated on a slide.

CLIMB
To climb is the act of moving upwards, cross-coordinating arms and legs, on a vertical or inclined surface or net.

PULL
To pull is the act of pulling an item towards you or you towards an item with one or both hands, or possibly using the entire body.

SOCIALIZE
To socialize is the act of meeting, communicating or cooperating in an activity that stimulates and facilitates social interaction.

CONSTRUCT
To construct is the act of creating new patterns, shifting items or materials to new positions or constructing with materials that can be transformed or manipulated.

PUSH
To push is the act of pushing an item away from you with one or both hands, possibly with the entire body.

SPIN
To spin involves a fast, repeated horizontal or vertical turn of the body on a piece of equipment that facilitates the movement.

CRAWL
To crawl is the movement of moving forwards or backwards, cross-coordinating arms and legs, on a horizontal or slightly inclined surface.

ROCK
To rock is the action of rocking back and forth, or sideways, on e.g. a piece of spring equipment.

SWAY
To sway is the movement of swaying back and forth, or around, lying, seated or possibly standing, in a pendulant or circular movement, e.g. on a hammock or on a rope.

DRAMATIC PLAY
Dramatic play is motivated through play items that stage a frame, place or environment for acting out make believe or role play scenarios.

ROTATE
To rotate involves a vertical or horizontal slower paced turn of the body, facilitated by a piece of equipment.

SWING
To swing is the movement of swinging back and forth, or in circular movement, seated, standing or lying, in an unhindered arc.

GLIDE
To glide is the act of moving from one point to another without shifting the feet, in a horizontal or vertical movement, in a seated, lying or standing position, letting gravity do the work.

RULES PLAY
Rules play is motivated through play items that suggest games-with-rules, cooperation and team work, e.g. tic-tac-toe, timers or ball games.

WONDER
To wonder is motivated through play items that make children need and use their logical, abstract or creative thinking skills, as well as their memory.
