

Jumper Six-sided, 108x108x108cm

JUM103

Item no. JUM10301-0301

General Product Information

Dimensions LxWxH	168x193x0 cm
Age group	4+
Play capacity (users)	1
Colour options	

Bouncing on the Jumper Six-sided is one of the most popular activities of the playground. The children will be highly attracted to the immediate response of the Jumper to their movements and jump repeatedly. The small measure of the Jumper makes it perfect as playground "glue", connecting activities when put together in paths. This will support games

like The Ground is Lava. Jumping is a fantastic activity for motor skills such as balance, proprioception and rhythm. When jumping up and down, all big muscle groups get trained. The jumping on and off the Jumper additionally builds bone density. Bone density is primarily built during early youth, so to build strong bones for life, children should take as much

weight bearing activity as they can. There are few ways funnier than the responsive Jumper.

Jumper Six-sided, 108x108x108cm

JUM103

The jumping membranes are made of 6,0mm thick EP Ethylene-Propylene conveyor belt with polyester polyamide fabric carcass. Spring fixations are reinforced with steel bushings and washers on both sides. The membrane is ozone resistant and equipped with 5 center placed water drain holes.

All 36 springs are made of stainless steel to ensure durability and excellent corrosion resistance. The steel wire is 3,2 mm thick and the last five windings are cone shaped to ensure long lifetime of the jumper.

The tiles are molded in grey granulated recycled rubber (SBR/NR), and the KOMPAN logo is made of EPDM Ethylene Propylene Diene Monomer. Inside each of the rubber tiles there is a 3 mm hot dip galvanized steel plate.

All steel components are manufactured from carbon steel S235 in a thickness of 3 mm. Side panels, support walls for top frame, plates bended with SBR and plates flat for in-situ surfacing are hot dip galvanized.

As a unique feature the SBR tiles can be removed for cleaning and service. By loosening six screws the SBR tile can be lifted up to open and gain access to the springs (see instruction on KOMPAN Master).

If customized colors of the surfacing is requested all jumpers can be ordered with steel plates suitable for in situ surfacing in preferred color. For in situ installations there is no service opening option.

Item no. JUM10301-0301

Installation Information

Max. fall height	100 cm
Safety surfacing area	13,3 m ²
Number of installers	2
Total installation time	2.7
Excavation volume	1,03 m ³
Concrete volume	0,08 m ³
Footing depth (standard)	60 cm
Shipment weight	286 kg
Anchoring options	In-ground ✓

Warranty Information

Hot dip galvanised steel	Lifetime
Jumper springs	2 years
Jumping bed material	2 years
SBR rubber	2 years
Spare parts guaranteed	10 years

Jumper Six-sided, 108x108x108cm

JUM103

Bouncy floor

Physical: trains motor skills ABC: agility, balance and coordination, as well as proprioception and rhythm when jumping on and off. Bone density is built when jumping on and off.

Social-Emotional: turn-taking and cooperation skills when timing when to jump in and out, one after the other.

Sturdy rubber edging

Social-Emotional: supports turn-taking skills and cooperation offering a sturdy, yet softer waiting and observing space for children about to enter.

Jumper Six-sided, 108x108x108cm

JUM103

PHYSICAL
Joy of movement:
motor skills, muscle, cardio
and bone density

SOCIAL-EMOTIONAL
Joy of being together:
teamwork, tolerance and
sense of belonging

COGNITIVE
Joy of learning:
curiosity, understanding of causal
relationships and knowledge of the world

CREATIVE
Joy of creating:
co-creation and experimenting
with materials

BALANCE
To balance is to stay upright when walking or standing on a surface that makes this challenging (e.g. a wobbly, inclined, or narrow surface).

HANG IN ARMS
To hang in arms is the act of carrying the body with the hands or arms, possibly to traverse to another platform or play item.

SENSORY
To sense is the act of taking in information with the sensory system: seeing, feeling, hearing or sensing with the body.

BOUNCE
To bounce is the act of bouncing on a responsive, flexible, elastic or tensile surface.

JUMP
To jump is the act of jumping up or down on a hard surface.

SLIDE
To slide is the act of moving fast downwards seated on a slide.

CLIMB
To climb is the act of moving upwards, cross-coordinating arms and legs, on a vertical or inclined surface or net.

PULL
To pull is the act of pulling an item towards you or you towards an item with one or both hands, or possibly using the entire body.

SOCIALIZE
To socialize is the act of meeting, communicating or cooperating in an activity that stimulates and facilitates social interaction.

CONSTRUCT
To construct is the act of creating new patterns, shifting items or materials to new positions or constructing with materials that can be transformed or manipulated.

PUSH
To push is the act of pushing an item away from you with one or both hands, possibly with the entire body.

SPIN
To spin involves a fast, repeated horizontal or vertical turn of the body on a piece of equipment that facilitates the movement.

CRAWL
To crawl is the movement of moving forwards or backwards, cross-coordinating arms and legs, on a horizontal or slightly inclined surface.

ROCK
To rock is the action of rocking back and forth, or sideways, on e.g. a piece of spring equipment.

SWAY
To sway is the movement of swaying back and forth, or around, lying, seated or possibly standing, in a pendulant or circular movement, e.g. on a hammock or on a rope.

DRAMATIC PLAY
Dramatic play is motivated through play items that stage a frame, place or environment for acting out make believe or role play scenarios.

ROTATE
To rotate involves a vertical or horizontal slower paced turn of the body, facilitated by a piece of equipment.

SWING
To swing is the movement of swinging back and forth, or in circular movement, seated, standing or lying, in an unhindered arc.

GLIDE
To glide is the act of moving from one point to another without shifting the feet, in a horizontal or vertical movement, in a seated, lying or standing position, letting gravity do the work.

RULES PLAY
Rules play is motivated through play items that suggest games-with-rules, cooperation and team work, e.g. tic-tac-toe, timers or ball games.

WONDER
To wonder is motivated through play items that make children need and use their logical, abstract or creative thinking skills, as well as their memory.
