

Playhouse, GreenLine

BASIC752

With its child scale size the playhouse is a play motivator for the youngest. The open ends and walls widen the play space, making room for a lot of children playing from all sides. The table and benches provide a great meeting point for children, again and again. The high desks and the openings inside and outside inspire classic dramatic play, such as shop and home. Thus

the Playhouse invites and retains children's role play. Dramatic play is well-known to stimulate children's language skills and thinking skills, which are crucial in early childhood development of cognition. Themes such as house and shop, which young children recognise, set a frame for mimicking and elaborating on social interaction, training

children's understanding of the world. The dramatic play trains communication, language skills and social skills such as negotiation and empathy.

BASIC752

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco friendly material, which is not only recyclable after use, but also consists of a core produced from 100% recycled post consumer material from food packing waste.

The floor is made of 21,5mm thick plywood made from alder and pine wood. Both sides are covered by 2 layers of phenolic film with anti slip net pattern. All cutting edges are sealed with paint to ensure long lifetime

The roof is made of 16mm thick plywood made from alder and pine wood. Both sides are covered by 2 layers of phenolic film with anti slip net pattern. All cutting edges are sealed with paint to ensure long lifetime

KOMPAN GreenLine versions are designed with ultimate environmentally friendly materials with lowest possible CO2e emission factor such as EcoCore™ panels of 100% post consumer recycled ocean waste.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Validation of CO₂ calculation of: Themed play systems

Data version no. 2021-09-27

The CO₂ calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Themed play systems" represented by item no.: MSC641100-3717P.

(Scope 3 emissions include emission sources in the upstream and downstream value chain).
