

# Townsend with Roof

PCE111822

Item no. PCE111822-0902	
General Product Information	
Dimensions LxWxH	428x466x493 cm
Age group	4+
Play capacity (users)	13
Colour options	<span style="color: red;">●</span> <span style="color: blue;">●</span> <span style="color: green;">●</span>

Wow! The Townsend is a fantastic structure that inspires children. The variety of activities will encourage children to play longer and come back again and again. The Townsend offers ample climbing for active children. The varied climbing features train proprioception and cross-body coordination, which are fundamental for children's cross-modal

perception, which is necessary for instance for reading skills. The climbing net is an added challenge for moving up as well as across. It also offers nice places to sit and take a break, thanks to the big mesh sizes. The slide is a thrilling path to return to the ground. Apart from climbing, sliding and gliding, there are plenty of opportunities for social play that will help

children to build important social and emotional skills, and motivate them to play for longer.

PCE111822

## Curved slide

**Physical:** sliding develops spatial awareness and a sense of balance. Furthermore, the core muscles are trained when sitting upright going down.

**Social-emotional:** empathy stimulated by turn-taking.

**Cognitive:** young children develop their understanding of space, speed and distances when sliding down quickly.

## Climbing pole

**Physical:** cross coordination and muscle strength are trained.

**Social-emotional:** turn-taking and cooperation.

## Pipe ladder

**Physical:** cross coordination and eye-hand coordination are supported when children climb the ladder. The climbing also supports leg and arm muscles.

**Social-emotional:** learning about turn taking and cooperation.

## Fireman's pole

**Physical:** coordination is supported when going down, as well as arm and core muscles. Landing strengthens bone density, which is built for life in early childhood.

**Social-emotional:** turn-taking and risk-taking.

**Cognitive:** young children develop their understanding of space, speed and distances when gliding down fast.

## Climbing net

**Physical:** children develop cross-body coordination and muscle strength when climbing. The big meshes allow for climbing and crawling through, supporting proprioception and spatial awareness.

**Social-emotional:** the big meshes allow for more children to sit together and talk.

PCE111822

Panels of 19mm EcoCore™. EcoCore™ is a highly durable, eco friendly material, which is not only recyclable after use, but also consists of a core produced from 100% recycled post consumer material from food packing waste.

The ELEMENTS roofs are made of recyclable PE with a minimum wall thickness of 5 mm to ensure high durability in all climates around the world. The steel pipes are hot dip galvanised inside and outside for maximum durability.

Sails of commercial 95 high density PE knitted specially for sun-shade structures. The sails are treated with UV stabilizers to ensure a long life-time. The sails are supported by a hot dip galvanised steel frame and tightened by stainless steel devices.

Item no. PCE111822-0902

### Installation Information

Max. fall height	284 cm
Safety surfacing area	44.3 m <sup>2</sup>
Number of installers	2
Total installation time	17.2
Excavation volume	0.38 m <sup>3</sup>
Concrete volume	0.06 m <sup>3</sup>
Footing depth (standard)	90 cm
Shipment weight	503 kg
Anchoring options	In-ground ✓ Surface ✓

### Warranty Information

EcoCore HDPE	Lifetime
Post	10 years
PP Decks	10 years
Hollow PE parts	10 years
Spare parts guaranteed	10 years

The main posts are made of high quality pre-galvanized steel with powder coated top finish. Post tops are closed with caps of UV stabilized nylon (PA6). The grey colored molded decks are made of 75% post-consumer ocean waste PP material with a non-skid pattern and texture surface. All decks are supported by unique designed low-carbon aluminum profiles with multiple attachment options.

The slides are available in either moulded PE in different colours or in full stainless steel AISI304 t= 2mm.

The steel surfaces are hot dip galvanised inside and outside with lead free zinc. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

Cradle to Gate A1-A3	Total CO <sub>2</sub> emission	CO <sub>2</sub> e/kg	Recycled materials
	kg CO <sub>2</sub> e	kg CO <sub>2</sub> e/kg	%
<b>PCE111822-0902</b>	1,114.70	2.94	40.00

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

### Validation of CO<sub>2</sub> calculation of: Play systems

Data version no. 2021-01-11

The CO<sub>2</sub> calculation and data are in compliance with the principles of a carbon footprint impact according to the GHG protocol (Greenhouse Gas Protocol), Scope 3, cradle to gate related to all individual components in the product category: "Play systems" represented by item no.: PCM200309-0010. (Scope 3 emissions include emission sources in the upstream and downstream value chain).
