PAR1405

10 years

All boards are made of High Pressure Laminate HPL with a thickness of 17.8mm according to EN 438-6 and has a nonskid surface texture. The multilayer construction makes the boards durable and suitable for outdoor use with a high UV stability and high resistance to impacts, scratches, fire, water and humidity.

The steel surfaces are hot dip galvanized inside and outside with lead free zinc. The galvanization has excellent corrosion resistance in outdoor environments and require low maintenance.

The furniture is a freestanding product with optional anchoring possibilities. Kompan has multiple anchoring's to fit specific requirements for individual customer projects. The anchoring is sold as separate modules.

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))
