Explorer Ship, Small

NRO53801

Item no. NRO53801-1021	
General Product Information	
Dimensions LxWxH	583x841x443 cm
Age group	4+
Capacity (users)	26
Colour options	

The Explorer ship is a true magnet for children's play, drawing them back again and again with its rich variety of activities both above and below deck. Boarding the ship is an adventure in itself, with endless options like vertical planks, climbing nets, and cleats that challenge coordination and build muscle strength. Children are captivated by the many interactive features—binoculars, cannons, and the ship's wheel—all of which stimulate tactile exploration and fine motor skills, while sparking hours of imaginative, dramatic play. This kind of play not only entertains but also nurtures cognitive growth and social-emotional development. Physical skills are also put to the test as children navigate the deck and explore different routes across or down. The slide adds a thrilling element, tickling the stomach and enhancing spatial awareness.

Explorer Ship, Small

NRO53801

All Organic Robinia products by KOMPAN are made of Robinia wood from sustainable European sources. On request it can be supplied as FSC® Certified (FSC® C004450).

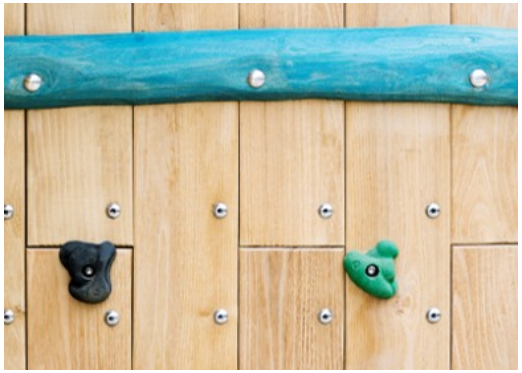
The paint used for coloured components is water based environmentally friendly with excellent UV resistance. The paint is in compliance with EN 71 Part 3.

Nets and ropes are made of UV-stabilised PA with inner steel cable reinforcement. The rope is induction treated in order to create a strong connection between steel and rope which leads to good wear resistance.

Item no. NRO53801-1021

Installation Information	
Total installation time	47.9 hours
Excavation volume	6.70 m³
Concrete volume	3.89 m³
Footing depth (standard)	100 cm
Shipment weight	3,082 kg
Anchoring options	In-ground ✔

Warranty Information	
Robinia wood	15 years
Stainless steel components	Lifetime
Ropes & nets	10 years
Spare parts guaranteed	10 years



The hardware is made of stainless steel or galvanised steel to ensure durable connections with a high corrosion resistance.

EN 1176 compliant

Sustainability Data

NRO53801

Cradle to Gate A1-A3	Total CO_2 emission	CO_2e/kg	Recycled material
	kg CO_2e	kg CO_2e/kg	%
NRO53801-1021	1,313.70	0.54	3.88

The overall framework applied for these factors is the Environmental Product Declaration (EPD), which quantifies "environmental information on the life cycle of a product and enable comparisons between products fulfilling the same function" (ISO, 2006). This follows the structure and applies a Life-Cycle Assessment approach to the entire Product stage from raw material through manufacturing (A1-A3))

Independent review certificate

Kompan A/S
C. F. Tietgens Blvd. 32C, 5220 Odense SØ

Bureau Veritas hereby attests that the CO_2e-calculations (covering materials, processing, waste and transport) done by Kompan for "Nature Play", meet the requirements set by the listed standard.

Kompan A/S uses a selection of EPDs and emission factors from the Life Cycle Assessment database EcoInvent 3.11. These values are reported as kg CO_2e, with all other impact categories excluded in line with the scope of ISO 14067:2018. The emission factors cover, material use, manufacturing processes, transport to Kompan, and electricity used during manufacturing. The presented emissions fall under GHG Protocol scope 3 emissions. Scope 1 and 2 are not presented. Scope 3 emissions include emission sources in the upstream value chain of a company, downstream emissions are excluded in this analysis.

Method: ISO 14067:2018 using GHG protocol guidance documents, reported as kg CO_2e.

Object

The verification has been done on the one pager "NRO40901-0601" version: 27-10-2025. The supporting documentation "KOMPAN data_updated emissions factors_2025_V2" and "Emissions factors, EPD's and ecoinvent 3.11_2025" was also reviewed and approved.

Declaration

The verification has been completed as a critical review with a limited assurance. I hereby confirm that nothing has come to the reviewer's attention which would lead to conclude that the study does not give an accurate depiction or isn't completed following method of the CO_2e calculation, the requirements of ISO 14067:2018, and 14071:2024, in the above referenced documentation.

Note: This verification only covers calculation elements according to method described in ISO 14067:2018 and may not be seen as a Life Cycle Assessment according to ISO 14067:2018.
