

BLX410301 BLOQX 3

With the third module things get really dramatic. A flying module is added to the two coupled modules, thus offering a number of totally new and exciting climbing routes. Not only is the airborne module much higher and more difficult to access, there are also tricky bouldering routes around the whole structure that get really tough, when you choose for the most difficult trip around the modules. Thus a climbing landscape is offered that can be a training arena, where enthusiastic training effort is rewarded with successful climbing. To secure the internal fall height, no climbing grips are placed on the surface adjacent to the flying BLOQX. Instead the plate is provided with a non slippery texture to provide a safe foothold.

Product Line	Urban climbing
Category	BLOQX™
Age group	8 - 15
Max. fall height (CM)	300
Total height (CM)	300
Safety Zone	33.9 m2
