## Circite with house membrane

The Circite With House Membrane is a three-dimensional rope environment in which the child can move freely in all directions. This ensure hours of play. Inside the construction, the children can prove their climbing skills on the rope, while the frame and long ropes at the sides are perfectly suited for hanging. Muscle strength, cross-body coordination and spatial awareness are trained. These skills are fundamental e.g. when judging distances and managing traffic securely. Apart from physical stimulation, membranes allow children to sit and talk, socializing.
