

COR10491

Dragite with house membrane

The vibrant colours and responsive, bouncy ropes, nets and membranes of the Dragite attracts children hugely. The varied climbing and meeting options make them want to come back again and again. The lower, yellow membrane squares provide a destination to climb to, bouncy seats that additionally support climbing onwards. This provides motion support in climbing for younger or less confident climbers, and variation for all. Additionally, the membranes function as meeting and retraction spots in the climbing landscape. The bigger membranes share this function. The main attraction is the bouncy climb up, down and across the Dragite. Concentration is needed when holding tight, as the ropes are inter-connected and reflect the movements of all climbers, throughout the net. This trains the muscles, cross-body coordination and spatial awareness, important for security in motion.

Product Line	Corocord™ rope playground
Category	Frame Nets
Age group	3+
Max. fall height (CM)	230
Total height (CM)	436
Safety Zone	57.4 m2
