Dragite dragonite

KOMPAN
Let's play

The impressive Dragite Dragonite attracts attention with its vibrant colors and whimsical details. The richness in play variation makes children play for a long time. The graded challenges in climbing enhances play experience and play outcome. The Dragite in short make children want to come back again and again. The bouncy inter-connected nets and membranes make everything move when children climb. This trains concentration and muscles as children hold tight when climbing up high. The height also massively trains spatial awareness. The climbing walls add variation to climbing. They create a front and back of the structure and facilitate rules play, e.g. hide and seek. The net tail makes a fine retraction point for quieter exchanges with friends. The play benefit of the Dragite is thrill: a collective climbing experience that trains the proprio-caption: the anti-spin tool of the body!

Product Line	Corocord™ rope playground
Category	Frame Nets
Age group	3+
Max. fall height (CM)	230
Total height (CM)	436
Safety Zone	63.4 m2
