

The Circite is an immense three-dimensional rope environment in which the child can move freely in all directions. The numerous ways of climbing ensures hours of play and attract children again and again. The Circite is transparent and this facilitates communication across and through the net. The bouncy interconnected nets makes the climber feel the movements of all the other children. This trains concentration and major muscle groups as children hold tight when climbing up, down and around the net. This trains important motor skills such as proprioception and cross-body coordination. These skills are fundamental e.g. for coordinating the cooperation of the left and right brain half, necessary for e.g. literacy. All in all a graded play event with rich play events.

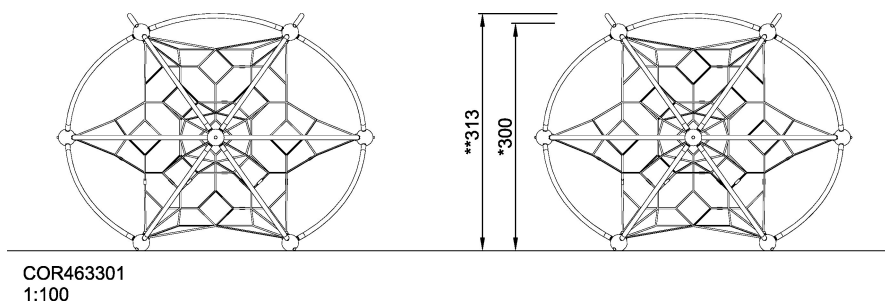

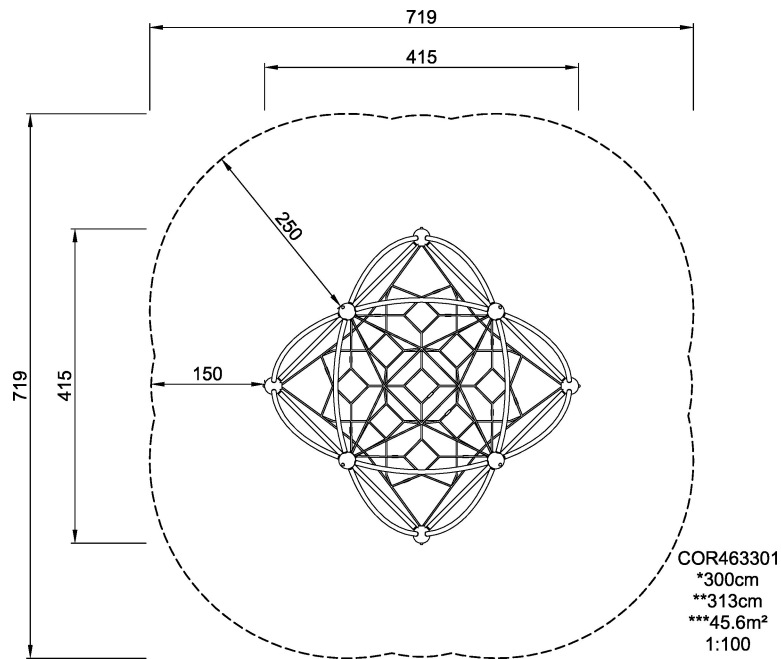

Product Line	Corocord™ rope playground
Category	Frame Nets
Age group	3+
Max. fall height (CM)	300
Total height (CM)	313
Safety Zone	45.6 m2
