## Explorer Dome

It's a jungle of fun! Amazing meandering nets, ropes and wobbly play items make the play of older children unstoppable. The spacious top net is a desired meeting point for huge groups of children. The ways to climb and reach the multiple play levels are many: via nets, wacky tubes, rope ladders, play shells or coconut ropes. This rich variety of climbing, crawling and balancing make children come back again and again to refine and supersede previous attempts at climbing the nets. The multitude of twisted, bouncing balancing and climbing events intensely support the child's motor skills ABC: agility, balance and coordination. Their spatial awareness is stimulated due to the transparency. This also makes social interaction easy. Socializing, turn-taking and empathy are social-emotional skills for life. In the Explorer Dome they come to use repeatedly.
