

Meeting point and climbing around focal tower This product is the optimal play equipment for the play pattern of 6-12 year-olds and perfect for one of their favourite games: Don't touch the ground. With the bouncy flex bridge and somersault bar, the wave with the free standing climbing wall, the twist net with its pipe climbers and the banister bars placed around the tower, there are plenty of play options all over the structure. Thanks to the PLAY360° design, all activities and the focal tower are connected making the product excellent for training spatial awareness, balance, and social skills. The product's high transparency makes it easy for the children to have a view of the entire product, be seen and watch their friends.
