MUGA, 6x12 meter

KOMPAN[®]
Let's play

The distance between the vertical tubes is small enough to keep even small balls, such as field hockey balls, inside the pitch at all times. By embedding the tubes into the steel frame we have created an extremely vandalism proof Panel that can be placed in the toughest of neighborhoods. The galvanized tubes almost disappear from a distance. This transparent design makes it easy to follow the game and makes the architectural environment stand out. All panels are connected to the posts with plugs made from Thermoplastic Vulcanizates. The plugs reduce the vibration in the MUGA & provide an easy installation.
