

With its spinning, swaying angles and shapes, POLLUX attracts thrilling balance play in 6-15 year olds. The inclined spinners invite smaller or bigger group to spin till they get dizzy. This is a favourite activity of middle school children. It will attract them for a long time, again and again. The overhead rocking activity, and the swaying ropes with UFO's are attractive trainers of upper body strength and cooperation with peers. Great also for those seated on top also, being rocked. The Rocking Tube makes a really challenging climber to the Triangle plates. These, and the play shell in the opposite Stabile provides rocking meeting points. The wide variety of spin, climb, sway and hang activities intensely train the child's coordination and sense of balance, important motor skills for e.g. sitting still on a chair. The meeting points encourage cooperation and turn-taking, skills easily learned in play.

Product Line	Urban climbing
Category	GALAXY™
Age group	6 - 15
Max. fall height (CM)	249
Total height (CM)	293
Safety Zone	71 m2

**SUR-
FACE**

* = Highest designated play surface.
** = Total height of product.

Weight/heaviest parts	kg.	Installation (Manpower)	Persons
