# Play tower with slide, wood posts & plastic slide

This dense play unit invites a full scope of fun, motor skill promoting sliding and climbing. Endless fun, but also great training of the child's motor skills, muscles and bone density. The landing from the fireman's pole is great training of the bone density which needs to be built for life throughout the first 10 years of childhood. The holding tight to the pole and the climbing up the wall trains the arm, leg and core muscles.
