Toddler Truck Stop

KOMPAN[®]
Let's play

Traffic and bus rides hold an enormous attraction to toddlers. The idea of going and being taken places appeals immensely and makes a recognizable theme that will spur conversations, thus supporting language development. The bus has several entrances in different shapes, inviting toddlers to climb over and through to the other side. The rubber inserts at the entrance apart from protecting from bruises also give a nice tactile variety in the materials. Inside the bus you'll find a small bench for a rest. The open design of the house supports play both on the inside as well as the outside of the panels and thus open for play from both sides, adding to the number of children who can benefit from the unit.
