Two tower with overhead

KOMPAN[®]
Let's play

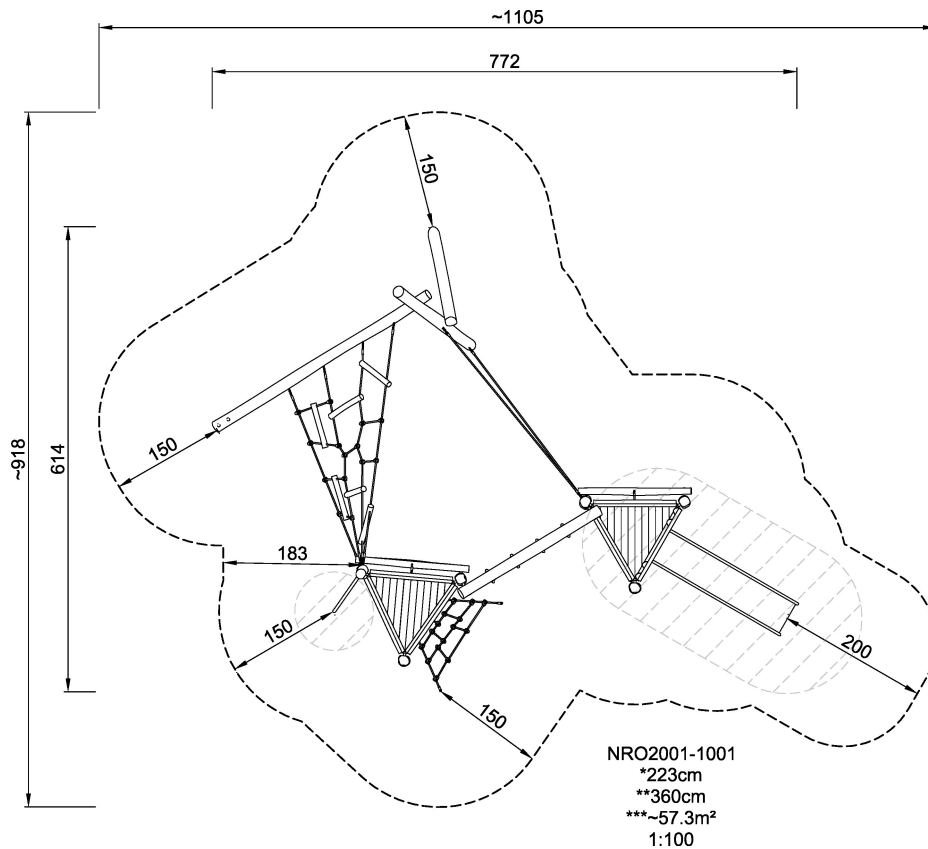

The Tarzan challenge of the Two Towers with overhead Handholds attracts children to try out their skills. Due to the varied activities, children will come back again and again to train and show off their newly gained play skills. The inclined and twisted climbing nets train important motor skills such as cross coordination and balance. The overhead handholds are great trainers of upper body strength. The balance ropes train the balance as well as the posture control. The two slide-down activities offer graded play challenges with each their stomach tickling reward and training of spatial awareness and core, leg and arm muscles. The variety of motor challenges adds to the fun of fundamental training: the mastery of body in space, a skill important for instance in managing traffic safely. The transparency of the structure makes possible communication and social interaction. In brief, elevated level play.
