Six-sided climbing structure

The six-sided climbing structure with its rich variety of climbing and crawling attracts children hugely. The many different ways of climbing and sliding must be tried out, which make the children stay longer and want to come back. The inclined climbing nets make challenging climbs to the top due to their non-horizontal steps. The climbing wall offers a vertical climb with an entrance to the top horizontal net either over the top or through the hole. The varied body positions demanded to manage the climb challenges train the child's proprioception, balance coordination and spatial awareness. These motor skills aid concentration and the ability to sit still. The fireman's pole and the banister bars are risk taking activities that tickle the stomach and train spatial awareness, necessary for judging distances, e.g. in traffic. A great active meeting point.

Product Line	Organic Robinia
Category	Traditional play, Sand and water play
Age group	6 - 12
Max. fall height (CM)	250
Total height (CM)	290
Safety Zone	58 m ²

IN-
GROU.

* = Highest designated play surface.
** = Total height of product.

Weight/heaviest parts	kg.	Installation (Manpower)	Persons
