

The Scout is an active, colorful play feature which attracts toddlers to come and climb, slide and glide. The numerous entrances offer much variety on this compact unit. This builds layers of play opportunities and attracts children again and again. The varied climbing accesses offer both a fast and easy and a more challenging way up to the platform. This trains muscles and cross-coordination. Cross-coordination is a fundament for later literacy. From the platform, there are two fun ways down to the ground, sliding or gliding. The fireman's pole trains the child's major muscles and gives them an understanding of space, which is fundamental for understanding mathematics. The slide trains the child's core stability and sense of balance.
