

The Pioneer is an inclusive play journey that makes children go wow. Thanks to the rich variation of play activities, children will come back again and again. A ramp leads through varied tactile play events to a vast platform with two slides. This allows for access to an elevated level. From the other end of the play structure, an accessible stairway winds up to the platform. On ground level there is a hammock, a desk for sand play, music panel and numerous tactile and turn-able features. Talk tubes allow fun contact across the structure. All of these activities train the child's logical thinking skills and sensory skills. The outside of the Pioneer offers three lovely corners for exploratory play and a break from the wilder action of the ramp. The transparency in the structure allows for interaction for all.
