# Playhouse with desk, wood posts

**KOMPAN**<sup>®</sup>  
Let's play

This little playhouse encourages children to develop physically, cognitively and socially. The sand scoop panel consists of two manipulative scoops that can be filled up and then moved along tracks, teaching children about gravity, cause and effect. The port window will help toddlers developing early social interaction skills and because the structure has no floor it will increase accessibility. Panels are accessible from both sides allowing at least two children to play with them at once.
