# Play Tower, Ultimate, ADA Stairs

**KOMPAN**  
Let's play

This accessible multi play house structure on poles makes a great offering for both the cognitive, creative, social and physical play development of the child. An ADA staircase, wide enough to room an assistant and with good grips in the side panels and the floors, leads the way to the house. There are two exits: the slide, offering stomach tickling joy, worth endless loops up the stairs and down the slide. Or, even better, a seated, rotating slide movement down the curly climber, holding onto the pole in the middle for extra support.

<b>Product Line</b>	Multi play structures
