

PCM101

Race Bike Springer

KOMPAN[®]
Let's play

Apart from being a highly appealing and fun activity, rocking back and forth stimulates the young child's vestibular system, supporting the senses of balance and space. To the young child, the fascination of making the Race Bike Springer move is fundamental and holds in it the learning of cause and effect: when the child rocks its body backwards, the force of that movement adds to the speed of the forward going movement to follow, with the assistance of the spring below.

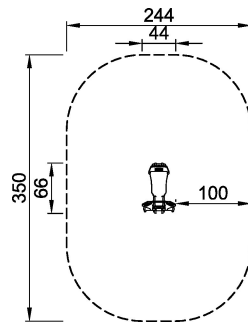

Product Line	Traditional Play
Category	Springers
Age group	2 - 6
Max. fall height (CM)	60
Total height (CM)	84.1
Safety Zone	7.7 m ²
