# Play Tower with Swing, Basic, Plastic Slide

**KOMPAN**  
Let's play

The combination of climbing, swinging and sliding is the recipe for great fun for school age children. The platform with the slide can be entered by the climbing wall or the sturdy stair rungs, and from the platform a stomach-tickling slide ride takes the child back to the ground. The swing is great fun and a feature that can be used by all generations, seated, lying on the stomach or standing.
