Toddler Carousel

KOMPAN[®]
Let's play

The Toddler Carousel adds spinning to swinging, making for a wild experience for the toddlers. The shared experience made possible in the three seats make the children want to try the Toddler Carousel again and again. Apart from being pleasurable, the spinning and swinging movements train the sense of balance and space. These are crucial motor skills, important for all other physical skills, and eventually concentration skills for learning. To babies, swinging trains their sense of space as well as their focal tracking. The seated position trains the core muscles. Socially, the three similar seats in parallel play trains thinking skills and the awareness of others from parallel play. The baby swing seat has big holes to support access and egress for the child and the adult alike. The front grips are designed to prevent the seat from tilting. This adds to the feeling of security, providing even more joy in play.

Product Line	Traditional Play
Category	Supernova, carousels & spinners
Age group	1 - 4
Max. fall height (CM)	150
Total height (CM)	207
Safety Zone	50.5 m2
