

This two tower multiple play structure invites play with friends all over. The ADA staircase, wide enough to room an assistant and with good grips in the side panels and the floors, takes the child to the tower with its Naughts & Crosses panel for a small break and play with a friend. From here a crawl through the tunnel allows for a nice peek out the big bubble window, which distorts the voice nicely when spoken into. The children can knock the window and gain contact with friends on ground level.
