

This varied play structure offers the ultimate climbing experience with the U-net: a swaying, big meshed hammock climber, which supports the child in climbing 3dimensionally, thanks to the two sides. A gentle, swaying movement is found when resting in the net hammock. The tower side of the structure is entered by an ADA stairway allowing for an assistant and offering support with grips in the floors and a roomy transfer platform. From the platform a lovely, rotating slide movement offered by the curly climber leads the child to the ground again.
