# Double Tower, Physical, ADA Stairs

This great ADA accessible play combination offers a variety of physically developing play activities: A supportive, inclined and wide climbing net with symmetric mesh sizes leads the child securely and fast onto a platform from which it can either wait for a friend and go down the double slide holding hands or take the bridge to the house platform, a level up as the bridge spans two levels and thus gives an extra spatial experience when going up, or down, the bridge. Once on the house platform, the house invites for a nice break.
