

## PCM400500

# Four towers with net & bridges, steel posts, st. steel slide

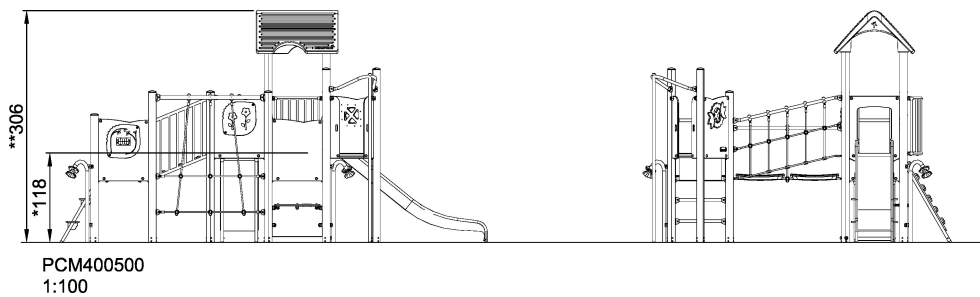

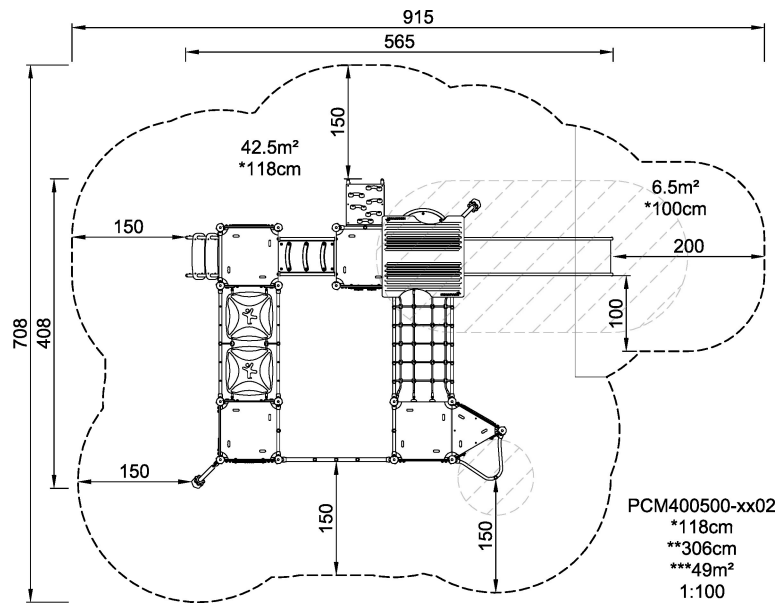

With its four towers this play structure is a closed loop allowing children to stay on the elevated platforms for a longer period of time. The talk tubes consist of two flower shaped openings that children can speak into and hear sound from. A number of panel activities are also included in the structure, including an abacus, a shop counter with conveyer belt, a flowers panel with rotating flowers, and two port windows at child level, which encourage social interactions with others on the ground.
