# Castle Castello ADA, PLastic Slide

The huge four tower Castle Castello offers a multitude of play activities that stimulate both physical skills and role play in a fantastic varied play structure. The Castle can be entered from a climbing rope ladder, a climbing pole or up the stairs. On the ground level of the Castle panels stimulate children's fine motor skills and teach them about cause and effect. Once on elevated level different activities support children's physical development when crawling through the tube, sliding or jumping down using the fireman's pole.
